

2500 Series

Irritrol Systems...

The choice of the professional irrigation contractor

Trust the products that irrigation contractors have counted on for years! Professional-grade Irritrol Systems components are designed and manufactured with a focus on heavy-duty construction, dependable operation and homeowner convenience.

A brand of The Toro Company specifically for professional irrigation installers, Irritrol Systems is a name you can trust to help provide the beautiful, trouble-free lawn and garden your home deserves.

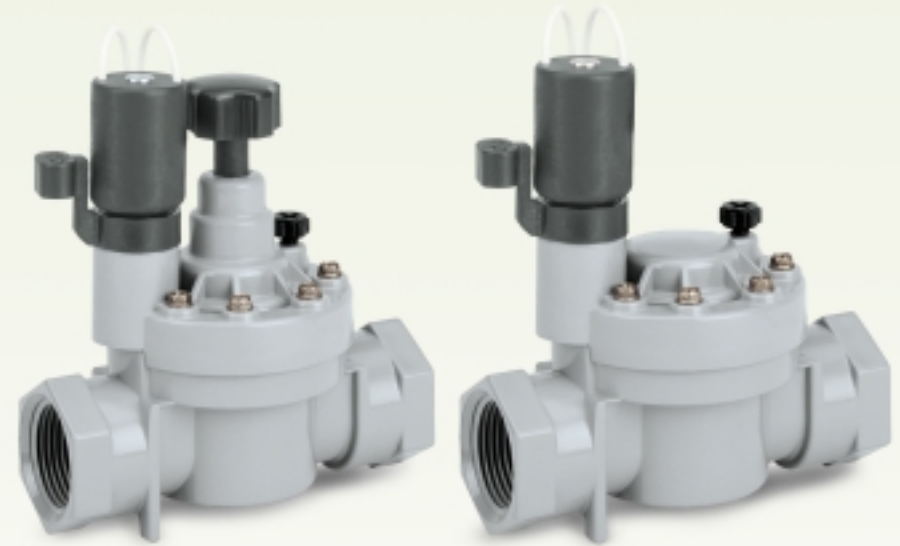

The most important quality a valve can offer is durability. Combine this with a number of advanced features, and you have the Irritrol Systems 2500 Series valves!

The 2500 Series is an open and shut case for performance

Though simple, the job of a valve is extremely important. In order to ensure a beautiful landscape, a valve must open and close reliably – every time! It also should be able to withstand variances in water pressure, tolerate debris in water, and also be simple to adjust and service.

Rugged and full-featured, Irritrol Systems 2500 Series valves provide dependability and a number of user-friendly features. They are highly debris tolerant to ensure reliable, long-lasting operation, and they easily can be serviced without being removed from the system.

Designed for residential landscapes, the 2500 Series offers:

- Heavy-duty, stainless steel and UV-resistant PVC construction for durability
- Specially designed internal components for a leak-proof seal
- An exclusive metering system design to ensure reliable operation in recycled water
- Low-flow capability for proper performance with drip systems
- An optional, ergonomic flow control handle for easy adjustment and manual shut-off
- A self-aligning bonnet and captured screws for trouble-free servicing
- Both threaded and slip models for installation flexibility
