

# Nuvo Complete

Whole Home Water Softener and Filtration System

## Product Overview

NuvoH2O combination softener and filter not only prevents hard water build-up and removes existing scale, but provides great tasting water for your whole house.

The NuvoH2O water softener, without the hassle of salt, uses a process called chelation (pronounced key-LAY-shun) which binds with minerals in the water so they cannot react with other elements to produce scale.

Nuvo Complete excels at improving your water's taste and odor. The NuvoH2O water filtration system reduces chlorine and many of the contaminants which compromise your family's health and provides you and your family great tasting water.

## Product Benefits

- Protects and extends the life of water heaters, plumbing fixtures and appliances by preventing the accumulation of scale
- Reduces Chlorine, VOCs, pesticides, hazardous chemicals, odors and improves water taste
- Removes scale, restoring operating efficiencies to water heaters and appliances
- Eco-friendly — no salt, no waste water, no electricity
- NSF and FDA compliant
- Easy installation - no drain, no calibration, no electricity and no soft-water loop required
- Compact design fits almost anywhere
- Low pressure drop and high contaminant holding capacity filter

## Filtration System Specifications

- 10 Micron Carbon Filter
- Size: 8" x 26"
- Weight: 11 pounds
- 1" Brass Ports
- 4 PSI drop at 5 GPM
- Max Pressure: 100 PSI (6.8 bar)
- In-line System
- Whole House Filtration
- Built-in Pressure Release Valve
- Installation Guide
- Mounting Bracket & Hardware Included

## Softener System Specifications

- Homes up to 5,000 sq. ft.
- Size: 8" x 26"
- Weight: 14 pounds
- 1" Brass Ports
- Water Flow: 10 GPM
- Max Pressure: 100 PSI (6.8 bar)
- In-line System
- Whole House Softening
- Built-in Pressure Release Valve
- Installation Guide
- Mounting Bracket & Hardware Included
