

Round Type B Gas Vent

Round Rigid Pipe

updated photo

Use for venting listed natural gas or liquid propane Category I, draft hood appliances, or appliances that have been specifically tested and listed to use Type B Gas Vent. The appliances listed typically use Type B Gas Vent systems, but not always: Furnaces, Water Heaters, Boilers, Room Heaters, Decorative Gas Appliances, and Unit Heaters.

To calculate installed length, subtract 1 1/2" from each connection of vent. A 1" clearance (air space) to combustibles must be maintained. To calculate OD add 5/8".
