

SDS MAX VACUUM BITS

OVERVIEW

The MILWAUKEE® SDS Max Vacuum Drill Bits reduce airborne silica dust and provide increased productivity during the chemical anchor preparation process. The combination of dust extraction holes at the bit tip and the hollow shaft design allow dust to be removed through the bit while drilling holes, reducing airborne silica dust in the process. SDS Max Vacuum Drill Bits are an OSHA® Table 1 compliant solution when used with dust extraction vacuums. Additionally, SDS Max Vacuum Drill Bits leave clean holes which are ready for the chemical anchor installation, removing the need to use standard drill bits with the “blow-brush-blow” cleaning method, delivering up to 2X faster chemical anchor preparation. The 4-Cutter tip design delivers durability in concrete and concrete with rebar applications. The universal adapter fits most common dust extractor attachments.

FEATURES

- Drilling holes into brick, block, concrete and concrete with rebar
- Preferred Table 1 solution for the OSHA® Regulation on Crystalline Silica Dust (29 CFR 1926.1153), when used with a dust extractor
- Up to 2X faster chemical anchor preparation

SLEDGE™ SDS MAX SELF-SHARPENING CHISELS

OVERVIEW

Our SLEDGE™ SDS Max Chisels stay sharper longer. Reinforced edges deliver maximum durability and reduced wear over the life of the chisel. We’ve engineered our chisels to maintain sharper edges for increased productivity and maximum life. No re-sharpening or re-hardening is necessary, reducing downtime. Our MILWAUKEE® SLEDGE™ SDS Max Chisels are designed for SDS Max rotary hammers with high-grade forged steel for maximum durability and longer life in concrete demolition over our standard chisels.

FEATURES

- MILWAUKEE® SLEDGE™ Chisels: Stay sharper longer
- Reinforced Edges: Deliver maximum durability and reduced wear over the life of the chisel
- Engineered to Maintain Sharper Edges: Increased productivity
