CEFIONTECT®

CEFIONTECT®

ULTRA-SMOOTH CERAMIC GLAZE LEAVES NOWHERE FOR WASTE TO CLING.

Its microscopic surface ridges are far smaller than waste particles, leaving no place for waste to gain a foothold. Extremely durable, CEFIONTECT is designed for enduring beauty and cleanliness.

Enlarged sectional image of toilet surface

Eliminating the microscopic gaps where waste hides

Conventional ceramic may appear perfectly smooth to the eyes, but has gaps where waste and other build up hide. At just one millionth of a millimeter, CEFIONTECT's surface ridges are much tinier than waste particles.

What makes CEFIONTECT so durable?

Glass layers are burned onto conventional glaze, making CEFIONTECT an extremely durable material.

Hydrophilic ceramic surface images (CEFIONTECT)

Water has a strong affinity to CEFIONTECT

Hydrophilic describes organisms and materials that attract water. CEFIONTECT is hydrophilic. Water spreads easily over the toilet bowl, so waste particles easily wash away.

TORNADO FLUSH®

DYNAMAX TORNADO FLUSH®

USES 100% OF WATER TO CLEAN AND RINSE BOWL

DYNAMAX combines powerful bowl cleaning and waste evacuation using water that is 100% projected from the rim creating 360° cleaning power. Using only 1.0/0.8 or 1.28/0.8 gallons per flush, coupled with a 25% larger trapway diameter, this high-efficiency system uses 20% less water with improved performance while also creating a quieter flush. With a modern rimless design, it performs more consistently and is easy to clean.

TORNADO FLUSH®

360° CLEANING POWER REACHES EVERY SPOT USING LESS WATER.

TORNADO FLUSH not only cleans more effectively, it does so quietly using less water. Powerful streams of water merge and swirl 360 degrees, washing every spot inside the rimless toilet bowl.

Thoroughly washes where waste accumulates most easily

TORNADO FLUSH powerfully ejects a stream of water from a spout near the rear of the toilet bowl, which is where waste accumulates most easily, thoroughly cleansing this area and then washing the entire bowl.

TOTO's unique rimless design

The unique rimless design not only leaves no place for waste and germs to hide, it also makes it much easier to clean the toilet.

EWATER®

Available only on WASHLET S550e, S500e, S350e and S300e

EWATER+[®]

MISTS THE BOWL WITH ELECTROLYZED WATER TO KEEP THE BOWL CLEAN WITHOUT HARSH CHEMICALS.

EWATER+ cleans the wand and toilet bowl where waste and build up tend to accumulate and create stains that can become permanent.

Using no chemicals or cleaning agents, EWATER+ provides peace of mind every day that microscopic build up has no place to hide.

What is EWATER+?

How EWATER+ cleans

PREMIST, a fine mist of ordinary water, is sprayed inside the toilet

Since waste is less able to adhere to a wet surface, it is more easily washed away

EWATER+ is applied to cleanse the wand and toilet bowl and remove waste

EWATER+ is automatically sprayed 8 hours after the last use

CLEANSING FUNCTIONS

CLEANSING FUNCTIONS

WITH THE TOUCH OF A BUTTON, A WAND EXTENDS FROM UNDER THE SEAT FOR SOOTHING WARM-WATER CLEANSING.

How WASHLET® works

AIR-IN WONDER-WAVE® technology is the precise, pleasant, air rich stream that keeps you clean. As water is fired at different speeds, small droplets collide with larger ones, combining and expanding as the droplets fill with more air. The injection of air enlarges water droplets by around 30%.

Select the type of cleansing you desire each time.

REAR SPRAY

The rear spray is designed to clean the rear intimate area. It features pleasant, yet strong water pressure to target this specific area.

REAR SOFT SPRAY

It has a larger radius to cover more area. Lower water pressure makes for a soft, comfortable spray.

FRONT SPRAY

The front wash consists of large, soft drops for comfortable intimate cleansing – for a clean, fresh feeling.

WIDE FRONT SPRAY

It has a larger radius to cover more area. Lower water pressure makes for a soft, comfortable spray.

SELF-CLEANING WAND BY EWATER+

SELF-CLEANING WAND

BEFORE AND AFTER EACH USE, THE WAND AUTOMATICALLY CLEANS ITSELF WITH EWATER+®.

This thorough cleaning occurs inside the wand as well as all around the exterior. Even when the toilet is not being used, the wand periodically cleans itself to ensure constant hygienic conditions.

Self-cleaning inside the mechanism, too

Cleans the wand's exterior with EWATER+

Cleanses all the wand's interior water passageways with EWATER+

Easy to wipe clean

The wand is made of high-quality dirt-resistant resin. Although the SELF-CLEANING WAND maintains sanitary conditions, you will appreciate how easily it wipes clean.
