within this beautiful collection,” says Danielle Radic, product manager, kitchen, Moen. “With its gooseneck spout and two-handle bridge design, the Weymouth pulldown bridge faucet is a stunning centerpiece that’s chic in any kitchen, while the addition of a Matte Black finish across the Weymouth portfolio helps bring a contemporary touch to more classic design aesthetics.”

For even more design customization, homeowners can choose either cross or lever handles, as well as the choice of matching finish handle caps or handle caps with porcelain inlays with antiqued decorative script in either English or French.

In addition to the new pulldown bridge faucet, Weymouth also is available as a single-handle pulldown faucet, with or without Moen’s touchless, voice-activated U by Moen™ Smart Faucet technology; as a single-handle pre-rinse spring pulldown faucet; and as a single-handle fixed faucet.

For added convenience at the kitchen sink, Weymouth pulldown faucets offer a pulldown hose with extended reach, while retracting effortlessly and docking securely. The pulldown faucets also feature a premium metal, multi-function wand to help consumers maximize time spent at the sink, including select models with Moen’s innovative Power Boost™ spray technology.

Weymouth fixed faucets offer rubber spray formers on the side spray, which makes it easier for homeowners to keep clean, while offering a front trigger for easy activation. To complete the kitchen, homeowners also can choose from bar/prep pulldown and fixed faucets, coordinating soap dispensers and Sip™ filtration faucet options.

WEYMOUTH KITCHEN FAUCETS FEATURE NOTABLE MOEN® INNOVATIONS, INCLUDING:

U by Moen™ Smart Faucet Technology

U by Moen™ Smart Faucets offer convenience, precision and intuitive touchless and voice-activation technology to help complete tasks in the kitchen, while also offering a myriad of style options to suit almost any design aesthetic. Users have four ways to control the faucet: voice activation, a hands-free wave sensor, a smartphone app and the handle. U by Moen Smart Faucets are the only voice-activated kitchen faucets on the commercial market to dispense water as small as one tablespoon and as large as 15 gallons at a specific temperature. Using voice control, consumers can ask voice assistants to remotely start and stop the flow of water, activate personalized presets and perform specific tasks, like fractional measurements,

temperature – both precise (90-degree) or generic (hot) – and combined requests, such as ½ cup of 90-degree water. A new “wash hands” command is even available to help ensure proper handwashing procedure -- when issued, the water turns on, then pauses for 20 seconds while a user scrubs their hands, thus encouraging both more complete handwashing as well as saving water.

Power Boost™ Spray Technology

Available on the two-handle pulldown bridge faucet, single-handle pulldown, single-handle pre-rinse spring pulldown and single-handle pulldown with U by Moen Smart Faucet technology, Moen's Power Boost™ technology fills containers faster and provides 50 percent more spray power versus Moen faucets without Power Boost or Power Clean™ for quicker cleanup with the push of a button.

Power Clean™ Spray Technology

Featured on the Weymouth single-handle pulldown bar/prep faucet, Power Clean™ technology cleans 50 percent faster than most Moen pulldown and pullout faucets without the Power Clean technology, while containing splash and minimizing mess. Greater force means faster clean-up with less water used.

Reflex® System

Pullout and pulldown kitchen faucets with the Reflex® system offer a self-retracting spray wand designed to put itself away, while also providing smooth operation, easy maneuverability and secure docking.

Spot Resist™ Finish

All Weymouth faucets are available in Moen's exclusive Spot Resist™ finish, which resists fingerprints and water spots to maintain the brilliance of the fixture.

1234® Duralast® and 1255® Duralast Cartridges

This unique ceramic-disc design provides the smooth feel and reliable operation of a new faucet from the first time you use it to the last. Single-handle faucets feature the 1255® Duralast® Cartridge, while two-handle faucets offer the 1234® version.

Duralock® Quick Connect System

The intuitive Duralock® Quick Connect System uses a proprietary, push-button connector that makes installing faucets quick, secure and hassle-free – no tools required. A telltale “click” audibly signals a secure connection.

All products feature Moen's lifetime limited warranty* to ensure superior quality. For more information on the Weymouth kitchen collection, visit moen.com or call 1-800-BUY-MOEN (1-800-289-6636).
