# PLUG INTO POWER AND CONVENIENCE

## with NuTone Inlets.

Turn to the source for power and intelligence. NuTone’s line of central cleaning inlets include built-in, low-voltage terminals where direct-connect hoses plug right into the inlet – alleviating the need for a power cord. The electrified inlets make it a simple one-step operation to plug in a current-carrying hose.

The system turns on automatically when an unswitched hose is inserted or is ready for immediate activation with a switched hose.

NuTone inlets are the source of ease and convenience when working with a central vacuum system.

### ELECTRIFIED INLETS

Electrified Inlets make it a simple one-step operation to plug in a current-carrying hose – no 120V extension cord to carry around. Compatible with NuTone CH615.
