

Unbeatable Performance & Value

Rain Bird's 3" PESB valve is built to last. This valve offers efficient, trouble-free performance – even under harsh operating conditions. Designed to withstand the demands of a master valve; the 300 PESB excels in applications requiring long duty cycles, unpredictable pressure variations and a variety of potable and non-potable water sources.

Efficiency

- Low pressure drop across valve
- Manual flow control
- Globe and angle inlet for flexible installations

Debris Management

- External bleed bypasses electric solenoid when system is flushed to prevent debris from accumulating on internal seals
- Active scrubber self-cleans the internal filter

Durability

- Glass filled nylon body to resist chemicals common in reclaimed applications
- Enhanced diaphragm material
- Stainless steel components
- Slow closing to prevent water hammer
