

Best-In-Class PEB Valves — Now Even Better.

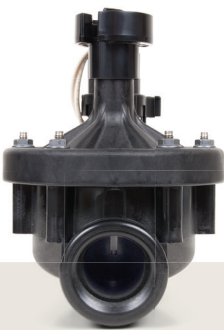

Built even stronger in our effort to continually evolve the most durable products on the market, Rain Bird® PEB series valves are setting a higher standard for commercial valves. With new enhancements, best-in-class PEB series valves are more durable than ever before:

- **A stronger, redesigned bonnet made with glass-filled nylon** stands strong at high pressures and outlasts competing valves.
- **Enhanced diaphragm material** ensures maximum leak prevention at extreme temperatures or pressures.
- A robust one-piece solenoid design with captured plunger and spring offers easy servicing.
- Stainless steel studs molded into the body let you remove the bonnet without damaging threads.
- External bleed protects the solenoid ports from debris when the system is flushed.
- Slow-closing operation prevents damage caused by water hammer.
- Self-cleaning pilot filter scrubber scrapes grit from the pilot filter, protecting the valve when there's a lot of debris in the water (PESB and PESB-R only).
- Chlorine-resistant materials protect internals from the chemicals found in recycled water (PESB-R only).

Three Models to Meet Any Challenge

No two jobsites are the same. So we give you three unique options for installing the industry's most durable commercial valve.

SERIES FEATURES	PEB	PESB	PESB-R
Stronger, glass-filled nylon bonnet	•	•	•
Enhanced diaphragm materials	•	•	•
Robust one-piece solenoid	•	•	•
Stainless steel studs molded into the body	•	•	•
External bleed	•	•	•
Slow-closing operation	•	•	•
Self-cleaning pilot filter scrubber		•	•
Chlorine-resistant materials			•

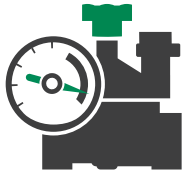

PERFORMANCE IN PUNISHING CONDITIONS.

New PEB series valves are designed to endure any environment, standing up to the challenges of alternate water sources and high-pressure situations:

65% Higher Leak Resistance

After extreme temperature swings, PEB series valves have 65% higher leak resistance than competing valves.

20% Higher Valve Burst Pressure

High pressure is no problem for PEB series valves, with 20% higher valve burst pressure.

50% Less Pressure Loss

PEB series valves deliver 50% less pressure loss than the leading competitor, so you can rest easy knowing the system will perform as intended.
