

Ratchet Shears

Ratchet shears with hardened steel blades are ideal for cutting PVC, PE, PP, PEX, and ABS pipe. For CPVC, use the RS1PLT, RS7290, or RSP1 because of blade thinness and finish. One-hand models **RS1** and **RS1PLT** offer a 7-step ratchet mechanism for best mechanical advantage and smoothest operation. RS1PLT is unique with a corrosion-resistant, nickel-plated, steel blade. Pointed blade in one-hand model **RSP1** helps start the cut in tough plastics such as CPVC, and helps avoid bounce in thin wall material. The two-hand **RS2** features 2" capacity, extra wide, v-style jaws for easy alignment, and long handles for leverage on tough-to-cut pipe. **RS7290** one-hand style, 2" capacity shears cut PE, PVC, and CPVC pipe used in gas, water, plumbing, and industrial applications, as do the other ratchet shears. All ratchet shears' blades can be easily sharpened or replaced, enhancing performance and saving money. These tools are not disposable and perform better, longer, and for less money over the tool's lifetime.

✓ WHY REED?

Broader base and 7-step ratcheting mechanism on RS1/RS1PLT models mean square cuts are easily attained with minimal clearance.

EXCLUSIVE FEATURE

Scissor Shears

Scissor Shears squeeze together for fast cutting of thin wall and small diameter PE, PEX, rubber, or nylon tubing. Use the **SC1SS** for PVC cuts. Rotate shears around tubing while squeezing handles together for the best cut. All models feature a new grip design for more secure hold. **SC1SL** and **SC125SL** are spring-loaded for quick open and faster cutting. Regular replacement blades are Teflon®-coated and there is a tough, stainless steel blade option (SC1BSS) which is better for cutting PVC.
